Oversized	A4F.E	Custom Configuration	A4K.E

**STEP 11: APPLY NUMBERING, BRANDING, AND SIDE PANEL PLUGS**

**26-28**

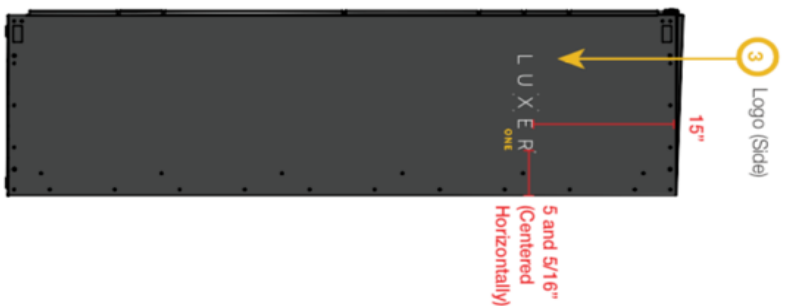

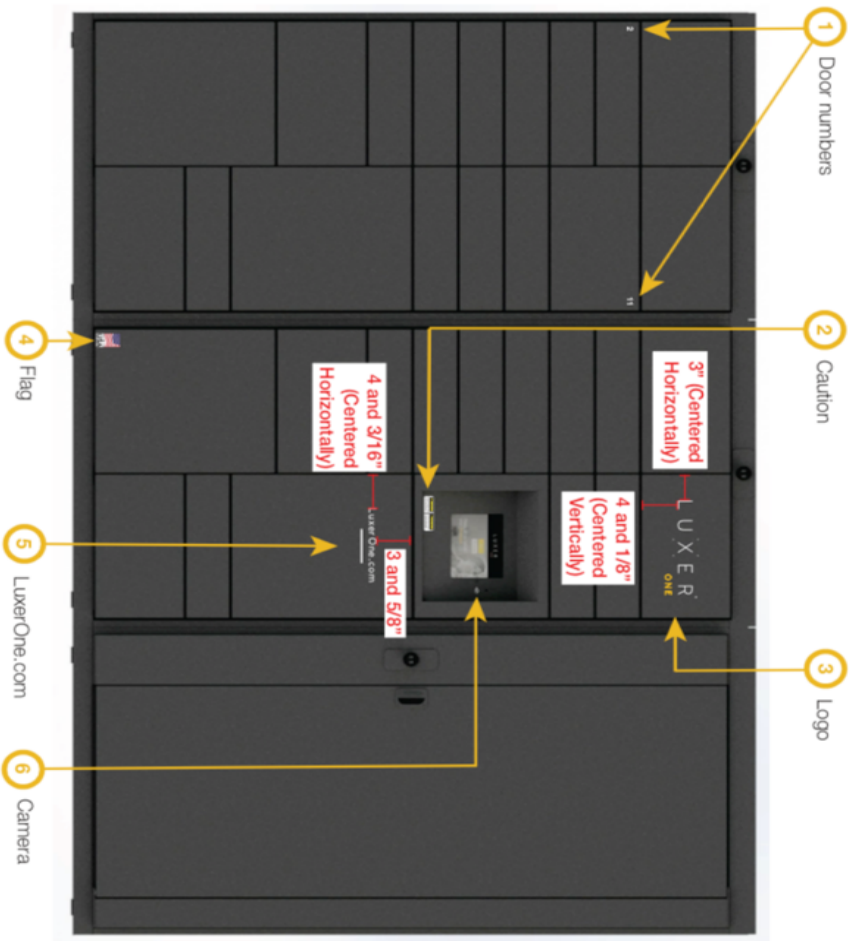

Technical Support: **415-390-0123 x992**

## Step 11: Apply Numbering, Branding, Locker Side Plugs

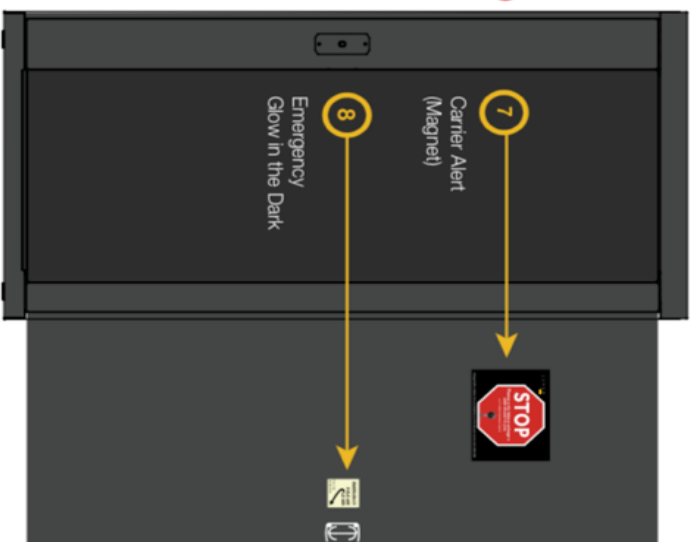

- Review the decal placement document on the next page thoroughly. It will cover all decal variations that you may receive in your kit.
- Start with numbers and apply them to the upper corner on the **hinge side** of each door. These must be applied starting on the farthest left top locker compartment.
- It is critical that you pay attention to ensuring no numbers are placed on crooked. Properties will be critical of this. This will take some time.
- Apply the camera sticker to the right of the actual iPad camera. This decal is included in the iPad box on top of the iPad.

# Luxer One Locker Decal Placement

\*Your install kit may not include all the decals shown here. Please follow the instructions to install only the decals included in your kit.

Inside door of Oversize Locker

1

## Door number Decals

To be placed on each locker door, evenly, on the outer hinge side upper corner of locker door. 1/2" down and 1/2" in from hinge. These must be applied starting on the farthest left top locker compartment. Top to bottom and top to bottom just as the lock wires were connected. These need to be symmetrical and level.

2

## Caution Decal

This decal is required by law for UL electrical safety standards and product certification. Place in lower left corner of control screen door, just above the metal seams. **Placing this decal is a required step in every installation.**

3

## Luxer One Logo Decal

Apply the Luxer One logo decal to the Main locker bank. **Centered** on the top medium door above the touchscreen. If side is exposed also apply to the locker side. Be sure to use a tape measure for proper leveling and symmetry.

5

## LuxerOne.com Decal

Apply the LuxerOne.com decal to any Main locker banks. Apply to the door below the iPad locker, **centered on the door as shown**. Be sure to use a tape measure for proper leveling and symmetry.

6

## Camera Decal

To be placed on iPad locker door to the right of the actual iPad camera. This decal is shipped inside of every iPad box. Look closely as it's very small.

4

7

8

If these decals and/or magnets are provided in your kit, apply them as illustrated above. Use a tape measure for leveling and symmetry.

- Last, make sure the locker side plugs are inserted to provide a clean and finished look. Shown below.
